INDEX '79

ACTIVATED CARBON
Space squeeze nets compact treatment ..... March 22

ADVANCED WASTE TREATMENT
Operator finds control at his fingertips ..... Feb. 57
LAND TREATMENT vs. AWT—how do costs compare? ..... Aug. 16
PBR—A new addition to the AWT family ..... Aug. 20
Land treatment vs. AWT—how do costs compare/Part 2 ..... Sept. 51
Quality is a must at Stony Brook AWT ..... Nov. 32
AWT Plant makes wastewater potable ..... Nov. 36
Limited space does not limit treatment ..... Nov. 53

AERATION
Lagoon aerator—not just a fair weather friend ..... June 28
Special design changes with the season ..... July 38
Activated sludge processes can be controlled ..... Oct. 32
Quality is a must at Stony Brook AWT ..... Nov. 32

ALGAE PROBLEMS
P, N & C head the critical list ..... April 45
Keep recreational waters algae-free ..... Oct. 14

AUTOMATION
Computer keeps an open mind ..... Feb. 20
Plant demands require reliable instrumentation ..... Feb. 26
Multiplex system improves water-usage control ..... Feb. 34
Nitrate analyzer monitors ailing well ..... Feb. 37
Sewage system gets the signal ..... Feb. 42
Turbidimeters curb health risks ..... Feb. 45
Fluidic regulators control overflow ..... Feb. 50
Operator finds control at his fingertips ..... Feb. 57

CHEMICALS
Excessive alum causes indigestion ..... April 24
P, N & C head the critical list ..... April 45
Don't let lime waste go to waste ..... June 18
Remove phosphate biologically ..... July 43
Storage of ozone makes purification easier ..... Aug. 29
Maximize overall phosphorus removal ..... Aug. 30
Phosphate ban lowers removal costs ..... Aug. 33
Chemical process treats combined sewer overflows ..... Sept. 25
Want a flocculating agent? Think cationic starches ..... Dec. 20

CLARIFICATION
Is alum sludge advantageous in wastewater treatment? ..... July 16
Special design changes with the season ..... July 38
Calculate activated sludge SRT accurately ..... Sept. 30

COLLECTION SYSTEMS
System grinds sewer problems to a halt ..... May 101

COMPUTERS
Computer keeps an open mind ..... Feb. 20
Operator finds control at his fingertips ..... Feb. 57
Optimum design uses minimum concrete ..... May 87
Program open channel flow design ..... May 95
The Manning Equation revisited ..... June 30
Home in on wastewater treatment ..... June 32
Computer program measures infiltration/inflow ..... Sept. 95
CLAW your way to land treatment costs ..... Dec. 17

CONSTRUCTION
Houston building its "largest ever" wastewater treatment project ..... Sept. 18

COST DATA
Chicago's TARP solves problems in big way/ part 2 ..... March 36
Compare sludge handling alternatives ..... March 60
Land Treatment vs. AWT—how do costs compare? ..... Aug. 16
Phosphate ban lowers removal costs ..... Aug. 33
Land Treatment vs. AWT—how do costs compare/part 2 ..... Sept. 51
Special features meet stringent limitations ..... Nov. 48
Design involvement leads to public acceptance ..... Nov. 50
CLAW your way to land treatment costs ..... Dec. 17
Want a flocculating agent? Think cationic starches ..... Dec. 20

DAMS
San Francisco makes dams earthquake safe ..... May 22
Calculate flood routing with ease ..... May 92

DESIGN
Chicago's TARP solves problems in big way ..... Jan. 18
Dry sludge zig-zags to irradiation ..... Jan. 32
Control panel plays watchdog ..... Jan. 39
Solve linear proportional weir design quickly ..... Jan. 50
Join forces for cost-effective harmony ..... March 18
Space squeeze nets compact treatment ..... March 22
Original design comes a long way ..... March 28
Chicago's TARP solves problems in big way/ part 2 ..... March 36
Design spruces up river site ..... March 53
Lobster town saves economy and ecology ..... April 19
Chicago's TARP solves problems in big way/ part 3 ..... April 30
San Francisco makes dams earthquake safe ..... May 22
Analyze land-use water-quality link ..... May 31
Model studies aid pond design ..... May 36
County facility survives growing pains ..... May 50
Pump out water—not energy ..... May 59
Optimum design uses minimum concrete ..... May 87
Program open channel flow design ..... May 95
Estimate detention reservoir storage ..... May 98
Montreal cleans up its waters ..... June 23
The Manning Equation revisited ..... June 30
W&WE design award judges are a varied group ..... June 35
Sound out noise potential ..... July 21
Special design changes with the season ..... July 38
NPSH: Basic to good pump application ..... July 48
Land treatment vs. AWT—how do costs compare? ..... Aug. 16
PBR—A new addition to the AWT family ..... Aug. 20
Houston building its "largest ever" wastewater treatment project ..... Sept. 18
Identify and prevent confined space hazards ..... Sept. 90
Consoer, Townsend & Associates design is outstanding ..... Nov. 21
Top design saves space and water quality ..... Nov. 22
Uncommon components combine to make clean water ..... Nov. 28
Quality is a must at Sony Brook AWT ..... Nov. 32
AWT plant makes wastewater potable ..... Nov. 36
Special features meet stringent limitations ..... Nov. 48
Design involvement leads to public acceptance ..... Nov. 50
Limited space does not limit treatment ..... Nov. 53
Compact design saves energy ..... Nov. 56

DISINFECTION
Original design comes a long way ..... March 28
The Manning Equation revisited ..... June 30
Storage of ozone makes purification easier ..... Aug. 29
Hydrogen peroxide makes an excellent sludge deodorant ..... Sept. 56
Quality is a must at Stony Brook AWT ..... Nov. 32
Examine water quality goals . . . Get more cost effective . . . Manage better at local level ..... Dec. 24

EDITORIALS
We applaud; we exhort ..... Jan. 17
Journals, "junkets", and all that jazz ..... Feb. 19
Should professionals go "public"? ..... March 17
Turnabouts can be humorous ..... April 15
This sleeper should be left to slumber ..... May 21
Spend a dollar to save a nickel? ..... June 17
Population policy will affect funding ..... July 15
You don't have to be a child to play games ..... Aug. 15
The Georgia peach that's not so sweet ..... Sept. 17
Who's auditing the auditors? ..... Oct. 13
Oh, overkill . . . Oh, overkill ..... Nov. 19
Two cases raise many questions ..... Dec. 13

ENERGY
Wastewater: Energy for the future? ..... June 39
Look to co-disposal—the waste handling method of the future ..... Sept. 71
Compact design saves energy ..... Nov. 56

ENGINEERING
Chicago's TARP solves problems in big way ..... Jan. 18
Join forces for cost-effective harmony ..... March 18
Compare sludge handling alternatives ..... March 60
Chicago's TARP solves problems in big way/ part 3 ..... April 30
San Francisco makes dams earthquake safe ..... May 22
Take a new look at the RBS process ..... May 41
Pump out water—not energy ..... May 59
Bring defective piping back in line ..... May 80
Optimum design uses minimum concrete ..... May 87

Turbidimeters curb health risks .....Feb. 45
Fluidic regulators control overflow ...Feb. 50
Operator finds control at his fingertips .....Feb. 57
Thermal monitoring measures up ....April 16
Excessive alum causes indigestion ..April 24

NITRIFICATION
PBR—A new addition to the AWT family .....Aug. 20

NITROGEN REMOVAL
Land treatment vs. AWT—how do costs compare?/part 2 .....Sept. 51

NOISE CONTROL
Sound out noise potential .....July 21

ODOR CONTROL
Lobster town saves economy and ecology .....April 19
Hydrogen peroxide makes an excellent sludge deodorant .....Sept. 56
Really improve operation and maintenance .....Oct. 21

OPERATIONS/MAINTENANCE
Bring defective piping back in line ....May 80
Really improve operation and maintenance .....Oct. 21
Special features meet stringent limitations .....Nov. 48
Training program improves plant performance .....Dec. 35

OPINION/COMMENT
Does U.S. need national sludge management policy? .....Jan. 44
Amend the amendments? .....March 33
Join forces with John Q. Public .....July 27
Look to co-disposal—the waste handling method of the future .....Sept. 71

PERSONNEL MANAGEMENT
Sewage system gets the signal .....Feb. 42
Plan thoroughly for a thorough IWS ...May 73
Training program improves plant performance .....Dec. 35

PIPE
Bring defective piping back in line ....May 80

PLANNING
County facility survives growing pains .....May 50
Plan thoroughly for a thorough IWS ...May 73
Wastewater: Energy for the future? ..June 39
Join forces with John Q. Public .....July 27

POLLUTION CONTROL
US, USSR shake hands on environmental protection .....July 31

PUMPS AND PUMPING
Pump out water—not energy .....May 59
System grinds sewer problems to a halt .....May 101
NPSH: Basic good pump application ..July 48

PRODUCT/PROCESS DEVELOPMENT
Remove phosphate biologically .....July 43

RESEARCH
P, N & C head the critical list .....April 45
Analyze land-use water-quality link ...May 31
Model studies aid pond design .....May 36
Wastewater: Energy for the future? ..June 39
Activated sludge processes can be controlled .....Oct. 32

RESERVOIRS
Chicago's TARP solves problems in big way .....Jan. 18
Chicago's TARP solves problems in big way/ part 2 .....March 36
Estimate detention reservoir storage ..May 98
Keep recreational waters algae-free ..Oct. 14
AWT plant makes wastewater potable .....Nov. 36

REUSE
'Closed loop' recycles industrial water .....Jan. 48
Recycle grey water for home irrigation .....Sept. 62

SAFETY
Sewage system gets the signal .....Feb. 42
San Francisco makes dams earthquake safe .....May 22
Don't let lime waste go to waste ....June 18
Identify and prevent confined space hazards .....Sept. 90

SEDIMENT PONDS
Model studies aid pond design .....May 36

SEWERS
Chicago's TARP solves problems in big way .....Jan. 18
Fluidic regulators control overflow ...Feb. 50
Chicago's TARP solves problems in big way/ part 2 .....March 36
Excessive alum causes indigestion ..April 24
Chicago's TARP solves problems in big way/ part 3 .....April 30
Bring defective piping back in line ....May 80
Estimate detention reservoir storage ..May 98
System grinds sewer problems to a halt .....May 101
Chemical process treats combined sewer overflows .....Sept. 25
Identify and prevent confined space hazards .....Sept. 90
Computer measures infiltration/inflow .....Sept. 95

SLUDGE CONDITIONING
Hydrogen peroxide makes an excellent sludge deodorant .....Sept. 56

SLUDGE DISPOSAL
Does U.S. need national sludge management policy? .....Jan. 44
Don't let lime waste go to waste ....June 18
Is alum sludge advantageous in wastewater treatment? .....July 16
Look to co-disposal—the waste handling method of the future .....Sept. 71

SLUDGE HANDLING
Success story times two .....Jan. 25
Dry sludge zig-zags to irradiation .....Jan. 32
Compare sludge handling alternatives .....March 60
Is alum sludge advantageous in wastewater treatment? .....July 16
Choose dewatering units according to the type of sludge .....Sept. 103
Activated sludge processes can be controlled .....Oct. 32

SLUDGE TREATMENT
Success story times two .....Jan. 25
Top design saves space and water quality .....Nov. 22
Uncommon components combine to make clean water .....Nov. 28
New problems can occur with anaerobic digestion .....Dec. 14

STORAGE
Estimate detention reservoir storage ..May 98
Calculate activated sludge SRT accurately .....Sept. 30

SURVEY
W&WE consults the consultants ....Sept. 34

TESTING
Solve linear proportional weir design quickly .....Jan. 50
San Francisco makes dams earthquake safe .....May 22

WASTEWATER DISPOSAL
Don't let lime waste go to waste ....June 18
Montreal cleans up its waters .....June 23

WASTEWATER
Wastewater helps the barley grow! ...Aug. 26

WASTEWATER TREATMENT
'Closed loop' recycles industrial water .....Jan. 48

WANTED!

Operations/maintenance or start-up/operating problem articles

Budding authors wanted to submit for possible publication (no complicated or restrictive publishing guidelines necessary) any worthwhile articles on operations/maintenance or start-up/operating problems, solutions, theory, practice, opinion, or comment.

Write what you would want other engineers or operators to read. If it imparts useful information we want it.

Don't be bashful—call the editor at 212-489-4663 or write us concerning your ideas.
